

AC SERIES

LIFT TRUCK OPERATOR ACCESS CONTROL

Material Handling Vehicles Operator Access Control

The AC series is a simple comprehensive recorder designed to provide organizations with ability to control that only certified operators are allowed access to the vehicles and assure that prior the shift use a OSHA / Pre-shift safety check is done. Operating as a stand alone unit system automatically prompts users prior to shift usage to acknowledge a “Pass” or “Fail” safety check then records it in the system. The system is self programmable by authorized manager and is able to create usage reports by simply downloading the data by USB port.
