

ED3C-K SERIES

SKIDWEIGH PLUS CLASSIC

Lift Truck Onboard Automatic Decentralized Operational Data Collection

SkidWeigh Plus Classic

The SkidWeigh Plus Classic as a mobile lift truck decentralized operational data collection platform is one of the quickest ways to secure payback on fleet management solutions by identifying activities of operators.

Fully automatic operational data recording with exceptional visual / audio alerts of events shown to the operator in real time will consistently reinforce ideal behaviour by establishing checks and balances to the process improvements.

Order Number	Functions
ED3C-K	Lift truck onboard decentralized operational data collection platform Keypad operator access control, onboard weighing scale with overload, impact, operational downtime and automatic OSHA / Pre-shift safety check detection with multiple colour lights alert. Data downloaded to USB port Vehicle operation is not disabled
