

IPT-1500

PRESSURE TRANSDUCER

Hydraulic Pressure
Transducer For All
SkidWeigh Products

Hydraulic Pressure Transducer

IPT-1500 pressure transducer is custom manufactured in Switzerland for SkidWeigh technology that meets the highest specifications for longevity, accuracy, temperature stability and EMC characteristics making them suitable for an extremely wide range of demanding industrial truck applications.

Typical Mounting Locations In Lift Hydraulic Line

Order Number	Functions
IPT-1500	Pressure transducer kit for all SkidWeigh products <i>(Cable included)</i>
IPT-1501	Pressure transducer only
IPT-1502	Pressure transducer 3 wires cable with plug
	Male port 1/4" - 18 NPT, pressure range 0-3000 PSI, (optional 0-5000 PSI), output voltage 0-2.5 V DC, polarity reversal protection, short circuit proof and protected against polarity reversal, quick connector M12x1 metal head DIN EN 175301-803-C, mounting installation unrestricted, weight 95g
